Professional Summary

Data Analyst and Business Intelligence professional with a Computer Science background and 2+ years of experience in SQL, MySQL, Power BI, DAX, Power Query, Excel, and ETL. Skilled in accessing, querying, and manipulating large datasets to support business analysis, with hands-on experience designing dashboards, defining KPIs, and driving data governance through standardized reporting. Experienced in translating data into actionable insights and business recommendations for cross-functional stakeholders across technical and non-technical teams. Strong focus on data quality, report writing, performance monitoring, and delivering reliable, business-relevant analytics in fast-paced, client-facing environments.

Technical Skills

BI & Visualization: Power BI (DAX, M Query, Star Schema, Data Modeling), Tableau, Excel (Advanced, Power Pivot, VBA), Google Sheets
Database & ETL: SQL (MySQL, PostgreSQL), ETL Development, Data Pipelines, Data Warehousing, Data Quality
Analytics: EDA, Trend Analysis, Statistical Modeling, KPI Reporting, Performance Tracking
Domain & Tools: Data Governance, Healthcare Analytics, Git

Professional Experience

Business Intelligence Analyst & Software Support June 2024 – Present
Safecare Technology *Sharjah, UAE*

- Access, query, and manipulate large **datasets** using SQL, Excel, and Google Sheets to support planned analyses and business reporting.
- Design and develop **Power BI dashboards** and reporting solutions by translating client business requirements into **KPIs**, data models, and actionable insights to support operational and management decision-making.
- Help define **KPI metrics** and drive **data governance** through standardized reporting models and consistent data quality checks across client implementations.
- Monitor **performance and quality control** across reporting systems, identifying improvements and ensuring timely, accurate delivery of reports to stakeholders.
- Present **analytical findings, dashboards, and performance reports** to clients and internal stakeholders, translating complex data into clear, actionable recommendations.
- Act as a **functional and technical liaison** between clients and internal teams, translating business requirements into practical system configurations, workflows, and process improvements.
- Lead **client software implementations** from requirements gathering through configuration, data migration, validation, training, and go-live.

Data Science Intern August 2022 – September 2022
Code Lab Systems *Mangalore, India*

- Collected, cleaned, and validated datasets using Excel and Power BI, applying data quality checks to improve accuracy and consistency.
- Performed exploratory data analysis to identify trends, patterns, and correlations that informed business recommendations.
- Developed interactive Power BI dashboards to communicate analytical findings to technical and non-technical audiences.

Academic Projects & Research

Skin Cancer Detection Using Deep Learning | ***Python, TensorFlow, CNN*** 2023

- Architected and implemented Convolutional Neural Network (CNN) for automated skin cancer classification from dermoscopic images, achieving accuracy, precision, recall, and F1-score exceeding 92%, surpassing industry benchmarks
- Conducted data preprocessing including image augmentation, normalization, and stratified splits ensuring model robustness across diverse demographics, with comprehensive evaluation using confusion matrices and ROC curves
- Demonstrated real-world deployment potential for clinical decision support, contributing to improved patient outcomes through faster, more accurate preliminary diagnoses

Workforce Analytics & Absenteeism Prediction | ***Microsoft Excel, ETL, Power BI*** 2023

- Analyzed employee data encompassing work preferences, sick leave patterns, and workload metrics using statistical hypothesis testing and correlation analysis, revealing flexible arrangements reduced unplanned absences

- Developed predictive models forecasting high risk absenteeism patterns, enabling proactive HR interventions and presenting data-driven recommendations improving workforce productivity and retention

IoT Smart Home Automation System | ***NodeMCU, Blynk IoT, C++*** 2022

- Engineered IoT system using NodeMCU (ESP8266) and Blynk platform, enabling control of 2-channel relay modules via smartphone and manual switches with real-time status monitoring and notifications
- Demonstrated practical IoT application and embedded programming, showcasing technical versatility beyond traditional data analytics

Education

Bachelor of Engineering in Computer Science July 2019 – July 2023
P.A College of Engineering, Mangalore (VTU) *Karnataka, India*

- Relevant Coursework: Data Structures, DBMS, Machine Learning, Statistics, Software Engineering, Cloud Computing, Big Data

Higher Secondary Education in Computer Science April 2017 – March 2019
The Model School *Abu Dhabi, UAE*

Certifications & Professional Development

- **Google Data Analytics Professional Certificate** – 8-course specialization: data cleaning, analysis, visualization, R, SQL
- **Microsoft Power BI Certifications** – Advanced dashboard development, DAX, data modeling, Power Query
- **Microsoft Excel & Azure Certifications** – Advanced Excel (Power Pivot, VBA), Azure Fundamentals, cloud analytics
- **PWC Power BI Job Simulation** – Client analytics, KPI dashboards, executive reporting for telecommunications
- **Accenture Data Analytics Job Simulation** – End-to-end analytics: data cleaning, analysis, stakeholder presentation
- **Additional:** Data Analytics for Business Professionals, Prepare Data for Exploration

Key Achievements & Impact

- Led **7+ healthcare client integrations**, achieving **100% data integrity** and full compliance with Dubai Health Authority regulations
- Developed actionable insights by bridging complex data systems and business requirements, enhancing operational efficiency across departments
- Designed and implemented automated ETL and Power BI solutions, reducing manual reporting effort and accelerating decision-making cycles by 35%
- Completed multiple professional certifications in Data Analytics and Power BI, demonstrating commitment to continuous learning and technical excellence

Languages

- **English:** Professional proficiency | **Hindi:** Basic | **Malayalam:** Native | **Arabic:** Basic

Personal Information

- **Date of Birth:** 03 April 2000
- **Nationality:** Indian
- **Address:** Sharjah, United Arab Emirates
- **Visa Type:** Employment Visa
- **Driving License:** License No: 1419429, Abu Dhabi, UAE (Light Vehicle)
